

GutterLock

CRITTER GUARD

GutterLock Critter Guard

6"x150' Roll - White/Black

- The GutterLock **diamond-shaped pattern** allows for breathability, providing airflow while still preventing wildlife intrusion.
- Single product with multiple practical uses, making it a reliable, time-saving solution for **repairs and wildlife exclusion**.
- Works great for **roof return patches, fascia board patching**, areas where squirrels or other wildlife have chewed the fascia
- It can also be used to **repair damaged soffit sections**, address construction gap issues, and patch holes anywhere they are present
- Material can be cut and utilized on the ends of ridge caps, as well as patched from inside of the attic for **ridge cap repairs**, making it useful for both **exterior and interior applications**.
- Exclusion work involving squirrels, flying squirrels, bats, raccoons, and other nuisance animals. It is especially effective for flying squirrels, where small entry holes are commonly the issue
- Comes with two colors per roll. White and Black (front/back) flexibility to match different structures

- **One roll 150' x 6"**
